

UCommerce Datatypes 1.5 INSTALLATION GUIDE

10/27/2012

Requirements

This software is built for Umbraco 4.9.1+ and UCommerce 3.0.0+.

Quick Setup

- Open your Umbraco back-end
- Click on developer icon in "Sections"
- Open packages and go to "Install local package"
- Check "I understand the security risks..."
- Choose the package file on your local hdd
- Click "Load Package"
- After a short while this package should be installed

How to use

- Go to settings section
- Open "Document Types"
- Create or modify a document type
- Switch to "Generic properties" tab
- Add properties with new UCommerce datatypes as needed, you can choose from UCommerce Catalog, UCommerce Category, UCommerce Country, UCommerce Product and UCommerce Multi Product

You are allowed to use this software for free according to our freeware license. Further information on the license can be found here:
